Novel Success Criteria

Success Criteria	Fully functional	Partially functioning	Not functioning

1. The program should have three buttons/options on the main window:
    a. 1st – to retrieve a report of books;
    b. 2nd -to enter a new novel;
    c. 3rd to exit
	✔		

2. The program allows users to create a new novel (edit and delete will not be allowed). The client must be able to:
    a. select the author from a predefined list of authors
    b. select a publisher from a predefined list of publishers (optional)
    c. Enter the novel name and other identifying information about the novel
	✔		

3. The new novel must be stored so that the next time the client opens the program, the novel is included	✔		
4. The program allows the user to retrieve a list of novels from the stored novel list	✔		
5. The program must exit gracefully when the user selects the "exit" button	✔		
6. The program allows users to enter as many novels as they want and run the report as many times as they want.	✔		
7. In case of data entry errors, info messages will appear on the screen.	✔
